Xicato Announces Two Week Lead Times on XTM 19mm LED Modules

Luminaire manufacturers can respond quickly to project opportunities, manage inventories

SAN JOSE, Calif., February 17, 2016 – Xicato, a leading manufacturer of intelligent LED modules for downlight and spotlight luminaires, today announced that they are providing consistent, two-week shipping lead times on their most popular products. The reduced lead time enables Xicato OEM customers to respond quickly to demand while keeping inventory levels low, without sacrificing any project design requirements, such as CCT, lumen output and specific color rendering. Customers and lighting designers can specify Xicato with confidence that products will ship on time – and that projects will be realized on schedule.

“XTM demand has doubled, year over year. We are continuously improving our supply chain in order to deal with increased volume without sacrificing quality,” said Mike Peanasky, VP Operations at Xicato, “We have installed a new, fully automated manufacturing line in the Philippines, and have for the past few months been consistently shipping our XTM 19mm LED modules within two weeks of receiving orders. Our customers have long come to expect this level of service, and we are delighted to be able to provide it again on our popular XTM product.”

He continued, “Lead times on all of our many new products have come down over the past several months, and we are making excellent progress toward providing two week order-to-ship throughout our product line by early 3rd quarter of 2016.”

Xicato products include the Xicato Thin Module (XTM), the Xicato Intelligent Module (XIM), and the Xicato Core Array (XCA) in a variety of spectral color rendering (CRI), white point (CCT) and lumen output packages, in both 9mm and 19mm light emitting surfaces. Xicato’s patented Corrected Cold Phosphor Technology® ensures unmatched color quality, beam uniformity, initial color consistency, lumen and color maintenance for Standard Series, Artist Series®, Vibrant Series® and new Beauty Series spectral options. These products will all be on display at the Light+Building exhibition in Frankfurt, Germany from March 13-18. [Click here](#) for more information.

About Xicato:

Xicato designs and develops LED light sources and electronics that enable architects, designers and building managers to create beautiful, smart spaces in which people love to live and work. With thousands of installations around the globe, Xicato continues to be a leading supplier of high quality LED lighting solutions. Xicato is defining the future of intelligent light sources by integrating electronics, software and connectivity. Founded in 2007, Xicato is headquartered in Silicon Valley, with offices in China, Japan, Europe and the US. For further information visit www.xicato.com.
