

Xicato Flicker Wheel Instructions

Best used in a “light clean” area with no other light sources interfering with the test.

1. Spin like a top under lights that you want to test.
2. If you see smooth gray stripes there is no flicker. Xicato XIM is flicker-free.
3. If you see checkers then flicker is present.

See a full description and summary of Stroboscopic Effects (Flicker) on our website. Download this Xicato White Paper. http://www.xicato.com/sites/default/files/documents/Flicker%20White%20Paper_0.pdf
