	4-year warranty		Non-Anodized
	Restriction of Hazardous Substance		Silver Anodized
	Recessed		Black Anodized
	Bendable		White
	Closet-Rated		Focusing Lens with 100% light transmission
	IP22		Universal Clear Pro with 91% light transmission
	Static White		Universal Frosted Pro with 80% light transmission
	High Density		Universal Clear with 85% light transmission
	Full Spectrum		Universal Frosted with 70% light transmission
	Side Emitting		Extreme Clear with 89% light transmission
	Ultra Slim		Extreme Frosted with 70% light transmission
	Dim to Warm		In-Ground Frosted with 58% light transmission
	Tunable White		Ultra Slim Frosted with 70% light transmission

*Most Xicato Channels are IP65 ready with proper sealant applied around the end caps to completely seal the XFL inside the channel.

Xicato designs and delivers one of the broadest portfolio spot and linear light sources and electronics that enable architects, designers and building managers to create beautiful, smart spaces in which people love to live and work. With thousands of installations around the globe, Xicato continues to be a leading supplier of high quality lighting solutions.

Xicato is defining the future of intelligent light sources by integrating electronics, software and connectivity. Founded in 2007, Xicato has offices in China, Europe and the U.S., with it's headquarters based in Silicon Valley.

Product Description

- Due to its high integrity and high load bearing capacity, the extrusion is ideal for high-traffic areas such as sidewalks, bike paths, environment friendly
- Designed to obtain an IP67 waterproof rating
- Designed to reach IK10 degree of protection against mechanical impact
- Resistant to pedestrian and road traffic

Finish

Non anodized (raw) **NA**

XCC-L Lenses*

XCC-L-GND-FR

XCC-E End Caps*

XCC-E-GND-NA-NC-HOLE
XCC-E-GND-NA-NC-STD

Internal Channel Dimensions

Height: 18.5mm
Width for LED: 12.2mm

Compatible XFL Products

Technical Drawing

As Installed

Technical Specification

Application:

- Construction of watertight, ground lighting fixtures inside and outside buildings (walkways, car parks, driveways)

Mounting:

- Mounted on spacer foam in a prepared gap in the hardened surface (e.g. paving stones)
- The remaining gap should be filled with sand

Additional information:

- Dedicated glands must be used for the correct application of the profile
- Water-tight splitters and couplers are used to run the cables powering the light fixture in the ground
- It is extremely important to properly seal all necessary components (extrusion, covers, end caps, LEDs)
- For sealing extrusion we recommend using transparent neutral silicone
- When choosing other sealing materials it is important to know their quality, applications and that they do not conduct electricity
- The quality of extrusion sealing depends solely on the quality and precision of the sealing process as well as the quality of the sealing material
- Profile construction makes it durable and sturdy, resistant to standard loads (up to 20 kN)
- Space for LED strip: 0.48" / 12.2 mm. Possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof
- Achieving IP67 is possible with the corresponding cover and end caps
- Possibility of making a linear fixture with IK10 degree of protection against mechanical impact, which means that the fixture can withstand an impact of a 5kg weight dropped from a 40cm height with 20J energy
- IK10 can be obtained with the corresponding cover and end caps

Note

Turn off LED lights during peak day light hours in outdoor applications to avoid excessive heat buildup which will result in diminished LED life.

Compatible Lenses

XCC-L-GND-FR In-Ground Frosted

58%

Description

Sturdy lens that easily adapts to the in-ground channel to seal the fixture. Lens has a good fire and mechanical resistance with complete UV protection. Transmits 58% light.

Compatible End Caps

XCC-E-GND-NA-NC-STD

Description

Basic PP end cap in gray. High resistance to damage. Will not corrode. Simple assembly. Aesthetically finishes the extrusion.

Mounting Instructions For Concrete

1. XCC-C-GND: Standard In Ground Channel
2. Pad*
3. Cable to power supply 24 V
- 4.1 Hermetic coupler (item 4.1) *
- 4.2 Hermetic coupler (item 4.1) *
- 4.3 Hermetic coupler (item 4.1) *
- 5.1 Connector (item 5.1) *
- 5.2 Connector (item 5.2) *

OPTIONAL, COUPLER NOT INCLUDED!

NOTE:

- All LED tapes must be connected to a 24 V power supply.
- Not all possible mounting procedures are presented here.
- Drawings of extrusions and accessories in these instructions are simplified and only approximate the actual shapes.

Mounting Instructions For Concrete (Continued)

1

Cut the groove in the concrete surface for the XCC-C-GND channel.

2

- Make space in the bottom of the groove for accessories necessary to mount the fixture.
- Lead the cable from the power supply 24V (3) to it.

Mounting Instructions For Concrete (Continued)

3

Place the pad (2) in the groove.

4

Detach items (4.2, 4.3) of the hermetic coupler from item (4.1).

Mounting Instructions For Concrete (Continued)

3

Lead the cable (3) through items (4.2, 4.3) of the hermetic coupler and attach it to the cable from the fixture, using both items (5.1, 5.2) of the connector.

4

Screw together all the items of the coupler.

NOTE! When inserting cables into the coupler, make sure that both items (5.1, 5.2) of the coupler are not touching each other.

NOTE! The items must be tightened with torsional power equal to 1.7 Nm.

Mounting Instructions For Concrete (Continued)

3

- Secure the edges of the groove and the surface of the fixture with protective tape.
- Distribute grout to the walls of the groove.

4

- Place the fixture in the groove.
- The excess grout should come to the surface from the sides of the fixture and at its ends.

Mounting Instructions For Concrete (Continued)

3

- Clean the surface of the fixture from the excess grout and remove protective tape.
- Wait 48 h until the grout dries.

Mounting Instructions For Pavers

1. XCC-C-GND: Standard In Ground Channel

2. Pad*

3. Cable to power supply 24 V

4.1 Hermetic coupler (item 4.1) *

4.2 Hermetic coupler (item 4.1) *

4.3 Hermetic coupler (item 4.1) *

5.1 Connector (item 5.1) *

5.2 Connector (item 5.2) *

*

OPTIONAL, COUPLER NOT INCLUDED!

NOTE:

- All LED tapes must be connected to a 24 V power supply.
- Not all possible mounting procedures are presented here.
- Drawings of extrusions and accessories in these instructions are simplified and only approximate the actual shapes.

Mounting Instructions For Pavers (Continued)

3

Detach items (4.2, 4.3) of the hermetic coupler from item (4.1).

4

Lead the cable (3) through items (4.2, 4.3) of the hermetic coupler and attach it to the cable from the fixture, using both items (5.1, 5.2) of the connector.

Mounting Instructions For Pavers (Continued)

3

Screw together all the items of the coupler.

NOTE! When inserting cables into the coupler, make sure that both items (5.1, 5.2) of the coupler are not touching each other.

NOTE! The items must be tightened with torsional power equal to 1.7 Nm.

4

Place the pad (2) in the groove in the pavers

Mounting Instructions For Pavers (Continued)

3

Secure the edges of the groove and surface of the XCC-C-GND channel (1) with protective tape.

4

Distribute the adhesive along the walls of the groove.

Mounting Instructions For Pavers (Continued)

3

Place the fixture in the groove. The excess glue should come to the surface from the sides of the fixture and at its ends.

4

Remove the excess glue.

Mounting Instructions For Pavers (Continued)

3

Remove the protective tape and wait 24 h until the glue dries.

4

Insert the missing paving stones.

Mounting Instructions For Pavers (Continued)

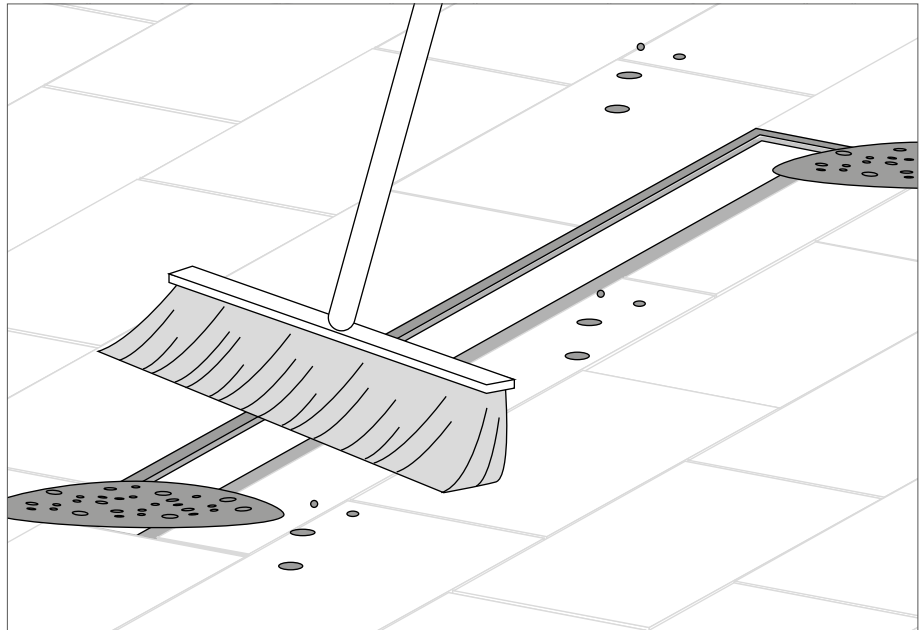

3

Fill the remaining grooves between paving stones and the fixture with sand.

4

Clean the fixture from sand.
