XICATO[®] XLD-ND-MW-OWA-90U-24-P1M

MEAN WELL

90W Single Output Moistureproof Adaptor

OWA-90U series

Features

- Universal AC input / Full range
- Built-in active PFC function
- Class 2 power unit (except OWA-90U-12/15)
- High efficiency up to 91%
- Protections: Short circuit / Over current /
 Over voltage / Over temperature
- Class II power unit, no FG
- · Fanless design, cooling by free air convection
- No load power consumption <0.15W
- Energy efficiency Level VI
- · Comply with EISA 2007 DoE and NRCan
- UL LISTED, suitable for dry and damp locations
- Various DC plug quick adapter accessory available (Plug kit sold sperately, please refer to : <u>https://www.meanwell.com/upload/pdf/DC_plug.pdf</u>)
- 5 years warranty

Description

OWA-90U is one 90W single-output external LED power supply series. Pairing the North American type of AC plug and the prevailing DC connectors, OWA-90U, working like an adaptor, simplifies the connection with LED lighting fixtures without extra wiring efforts. The entire series is certified with the "UL LISTED" for dry and damp locations.

As a class II (without earth pin) design, the enclosure of OWA-90U is a 94V-0 flame retardant plastic case. The interior is fully potted with silicone that enhances the heat dissipation. With the working efficiency up to 91%, OWA-90U is cooled by free air convection; the working temperature ranges from -40°C to +70°C.

Model Encoding

OWA - 90U - 12 - Blank:Plug for 12V~54V,power DIN 4P with lock type DC plug type Output voltage North American type of AC plug Output wattage Series name OWA - 90U - 12 - Blank:Plug for 12V~54V,power DIN 4P with lock type P1M:Plug for 20V~54V only,2.5 Φ x5.5 Φ x11mm,c+,tuning fork type Optional plug type available per request

Applications

- LED lighting fixture
- LED decorative lighting
- · LED office lighting
- General electronic products in dry or damp environment

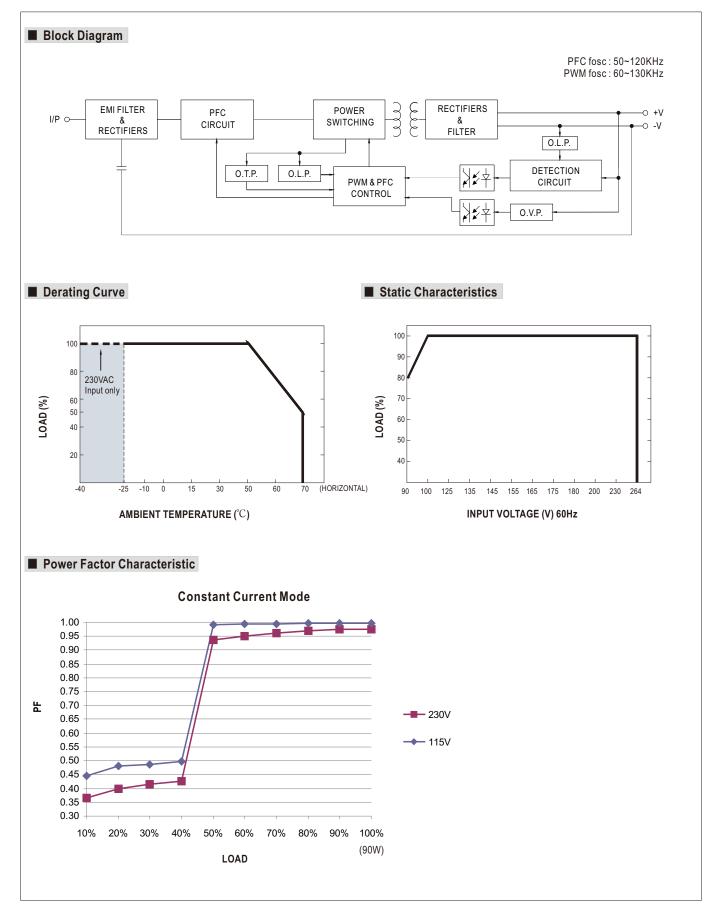

SPECIFICATION

90W Single Output Moistureproof Adaptor

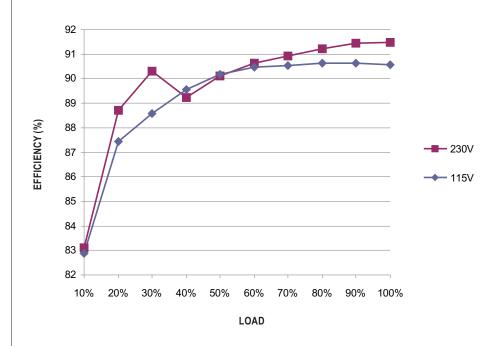

OWA-90U series

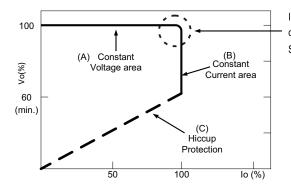

EFFICIENCY vs LOAD (48V Model)

OWA-90U series possess superior working efficiency that up to 91% can be reached in field applications.

DRIVING METHODS OF LED MODULE

There are two major kinds of LED drive method, "direct drive" and "with LED driver". A typical LED power supply may either work in "constant voltage mode (CV)" or "constant current mode (CC)" to drive the LEDs. Mean Well's LED power supply with CV+ CC characteristic can be operated at both CV mode (with LED driver, at area (A) and CC mode (direct drive, at area (B).

Typical LED power supply I-V curve

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems.

Should there be any compatibility issues, please contact MEAN WELL.
